ASPEN Protection System

As the UK based designer and manufacturer of all ASPEN Stainless, Canal Engineering is able to offer a full range of products to complete your protection system and can customize any of its Units or manufacture complete bespoke protection systems.

Key Benefits

Provides the appropriate style and type of handrail to suit the surrounding environment with particular attention being given to the aesthetics and finish of the detail.

Maintenance

Stainless steel equipment should be occasionally thoroughly checked for retained deposits and concentrated fluid build up that causes corrosion.

Cleaning

Many factors affect the choice of cleaning method and frequency of its application. Suitable methods for stainless steel are: water and steam; mechanical non abrasive scrubbing; organic solvents and mild detergents.
