

# ASPEN Davos Plus Drain Channel

## Load Class up to FACTA C250

Stainless

ASPEN Stainless hardworking stainless steel products for hardwearing environments:  
British engineered with a lifetime guarantee.

### Product Description

The standard Davos Plus Drainage Channel is manufactured in lengths suitable for the drainage system design. Cell bars are welded at one metre intervals to prevent the drain covers from sliding and aid installation. Suitable for hygienic environments accessed by mediumload factory traffic. The standard Channel is available in three standard sizes.

### Technical Specification

- > 25mm x 25mm stainless steel box section (Type 430) for added support and encloses the cavity.
- > Made from 2mm stainless steel.
- > Grade 304 stainless steel (British Standard 304S31, Euronorm 1.4301).
- > Compliant with EHEDG guidelines

MODEL	REF	CHANNEL DIMENSIONS			CUT OUT DIMENSIONS		MINIMUM FALL	FACTA LOAD CLASS
		A	B	C	X	MIN Y		
DAVOS 100	DAVPL100	100	150	210	410	CHANNEL DEPTH + 100	1:150	
DAVOS 170	DAVPL170	170	220	280	480	CHANNEL DEPTH + 100	1:150	
DAVOS 300	DAVPL300	300	350	408	608	CHANNEL DEPTH + 100	1:150	

The blue measurements indicate the variable dimensions shown in the chart above. All dimensions in mm.

### ASPEN Drainage System

As the UK based designer and manufacturer of all ASPEN Stainless, Canal Engineering is able to offer a full range of products to complete your drainage system and can customize any of its Units or manufacture complete bespoke drainage systems.

#### Key Benefits

The Davos plus range is medium duty profile with added strength in its profile for most light factory traffic environments. The simple design provides easy clean surfaces and a self draining fall slope and a box section infill for added strength and aids concrete infill.

#### Maintenance

Stainless steel equipment should be occasionally thoroughly checked for retained deposits and concentrated fluid build up that causes corrosion.

#### Cleaning

Many factors affect the choice of cleaning method and frequency of its application. Suitable methods for stainless steel are: water and steam; mechanical non abrasive scrubbing; organic solvents and mild detergents.

### ASPEN Drainage Installation

Canal Engineering offer supply only or full installation, with fully welded and polished joints, and commissioning. Canal Engineering also offer on-going annual inspection and maintenance contracts.

For advice regarding the most suitable ASPEN Stainless for you please contact our technical sales team today to discuss your requirements.
