

# ASPEN Straight Locking Rodding Eye

## Load Class up to FACTA B125

Stainless

ASPEN Stainless hardworking stainless steel products for hardwearing environments:  
British engineered with a lifetime guarantee.

### Product Description

The standard Locking Rodding Eye Straight is used at the termination of an underground drain run to allow access for rodding, which is bead blasted. The Rodding Eye has a tray to infill with a suitable matching floor finish.

Suitable for hygienic environments accessed by light factory traffic.

The Rodding Eye Straight is available in 2 standard sizes.

### ASPEN Drainage System

As the UK based designer and manufacturer of all ASPEN Stainless, Canal Engineering is able to offer a full range of products to complete your drainage system and can customize any of its Units or manufacture complete bespoke drainage systems.

#### Key Benefits

The stainless steel provides a hygienic finish within the factory environment to match surrounding equipment and with a tray to fill with a matching floor finish.

#### Maintenance

Stainless steel equipment should be occasionally thoroughly checked for retained deposits and concentrated fluid build up that causes corrosion.

#### Cleaning

Many factors affect the choice of cleaning method and frequency of its application. Suitable methods for stainless steel are: water and steam; mechanical non abrasive scrubbing; organic solvents and mild detergents.
