

ASPEN Meribel Central Side Outlet

Load Class up to FACTA D400

Stainless

ASPEN Stainless hardworking stainless steel products for hardwearing environments:
British engineered with a lifetime guarantee.

Product Description

The standard Outlet Meribel Central Side is based on the Vail Gully and provides low invert levels for connecting to underground drainage and can be positioned along the channel length. Complete with rodding access and a removable trash basket.

Suitable for hygienic environments accessed by all types of factory traffic.

The standard Outlet is available in four sizes to accommodate different flow rates.

Technical Specification

- > 1 x stainless steel removable trash basket.
- > 50mm water trap.
- > Grade 304 stainless steel (British Standard 304S31, Euronorm 1.4301).
- > EHEDG can be achieved with alterations

ASPEN Drainage System

As the UK based designer and manufacturer of all ASPEN Stainless, Canal Engineering is able to offer a full range of products to complete your drainage system and can customize any of its Units or manufacture complete bespoke drainage systems.

Key Benefits

The Meribel Outlet starts with a high invert level and has easy access for rodding and cleaning.

Maintenance

Stainless steel equipment should be occasionally thoroughly checked for retained deposits and concentrated fluid build up that causes corrosion.

Cleaning

Many factors affect the choice of cleaning method and frequency of its application. Suitable methods for stainless steel are: water and steam; mechanical non abrasive scrubbing; organic solvents and mild detergents.

ASPEN Drainage Installation

Canal Engineering offer supply only or full installation, with fully welded and polished joints, and commissioning. Canal Engineering also offer on-going annual inspection and maintenance contracts.

For advice regarding the most suitable ASPEN Stainless for you please contact our technical sales team today to discuss your requirements.
