

# ASPEN KC2 Wall Kerb | Internal Single Sided

ASPEN Stainless hardworking stainless steel products for hardwearing environments: British engineered with a lifetime guarantee.

## ASPEN Kerbing System

As the UK based designer and manufacturer of all ASPEN Stainless, Canal Engineering is able to offer a full range of products to complete your kerbing system and can customize any of its Units or manufacture complete bespoke kerbing systems.

### Key Benefits

This profile is ideal for installing with a Uragard resin floor. The kerb should be installed on the base slab. The Kerb is fully welded and made to suit sliding, personnel, roller doors, corners, tees and wall ends. The Kerb is easily removable if walls need to be removed, altered, or relocated.

### Maintenance

Stainless steel equipment should be occasionally thoroughly checked for retained deposits and concentrated fluid build up that causes corrosion.

### Cleaning

Many factors affect the choice of cleaning method and frequency of its application. Suitable methods for stainless steel are: water and steam; mechanical non abrasive scrubbing; organic solvents and mild detergents.

## ASPEN Kerbing Installation

Canal Engineering offer supply only or full installation, with fully welded and polished joints, and commissioning. Canal Engineering also offer on-going annual inspection and maintenance contracts.

For advice regarding the most suitable ASPEN Stainless for you please contact our technical sales team today to discuss your requirements.
